

## **GREAT DECISIONS 2022**

A roundtable discussion course centered on nine (that's right! an extra topic this year. So much going on!) important issues of American foreign policy as selected by The Foreign Policy Association.

Topics for Spring 2022 are:

Changing Demographics (Great Decisions briefing book article by Joseph Chamie)

Outer Space (...by Eric Berger)

Climate Change (...by Ron Bee)

Russia and the U.S. (...by Allen Lynch)

Myanmar and ASEAN (...by Hunter Marston)

Quad Alliance (...by Kevin Rudd)

Drug Policy in Latin America (... by Mónica Serrano)

Industrial Policy (...by Jonathan Chanis)

Biden's Agenda (...by John Ikenberry)

Each class will be set up with a number of opening questions, followed by robust group discussion, moderated by the co-facilitators. Basic information on each topic will come from the Great Decisions 2022 briefing book, supplemented by other materials. Most importantly we will rely on the unique life experiences and perspectives of class members. The facilitator(s) may occasionally be able to engage an outside expert on one of the topics, to help frame the issues. Come join the conversation!
